PROFILE SUMMARY

Financial and Data Analyst with hands-on experience in group-level revenue analysis, financial reporting, and performance insights within large healthcare organizations. Strong background in Power BI, Excel, SQL, and data modeling, with proven ability to translate complex financial data into clear, actionable insights for management. Experienced in working with trial balance, balance sheets, and departmental performance tracking across multiple business units.

PROFESSIONAL EXPERIENCE

Degla EGYPRO, *Financial Analyst* Nov 2025 – Present | Madi ,Cairo

- Analyzed monthly revenue and expense performance, providing insights to support management decisions.
- Prepared, reviewed, and validated trial balance reports, ensuring accuracy and consistency of financial data.
- Assisted in the preparation and analysis of balance sheets, identifying key variances and financial trends.
- Monitored expense structures and allocations, highlighting opportunities for cost control and efficiency improvement.

Andalusia Hospital, *Data Analysis* Dec 2024 – Jan 2026 | Madi

- Worked at the group level, analyzing revenue performance across multiple hospitals within Andalusia Group.
- Tracked hospital-level and department-level revenue, providing visibility into performance drivers and operational gaps.
- Built dynamic Power BI dashboards to monitor revenue trends from patient and service level up to departments and business units.
- Automated monthly group revenue consolidation using Power Query, reducing manual reporting effort by 40%.
- Designed data models to analyze profitability by specialty, service type, and referral source across hospitals.
- Partnered with finance leadership to deliver standardized KPI reports supporting executive and strategic decision-making.

EDUCATION

MSc in Software Engineering, Jul 2023 – present | Helwan

Helwan University | in Progress

- Thesis: Optimizing Data Analysis Workflows through Advanced Software Solutions

BSc in Computer Science, *Future University* Sep 2019 – Jan 2023

- Graduation Project: AI-based traffic violation detection (**95% accuracy**)
- Relevant Courses: Machine Learning, Database Systems, Data Structures

TECHNICAL SKILLS

Programming
- Python (Pandas, NumPy, Scrapy)
- SQL (CTEs, Window Functions, Query Optimization)

Data Engineering
- ETL Pipelines
- Database Design (MySQL, SQL Server)
- Apache Airflow (Basic)

BI & Visualization
- Power BI (DAX, Power Query, Dashboards)
- Tableau
- Excel (Advanced Formulas, PivotTables, VBA)

Data & financial analysis
- Financial Analysis, Revenue Analysis, Variance Analysis
- Trial Balance & Balance Sheet Analysis

PROJECTS

UK Railway Analysis & Forecasting, *(DEPI Project)*
- **Tech:** Python (Prophet, Random Forest), SQL (Schema Optimization)
- **Impact:** Forecasted £195K monthly revenue with **92% accuracy**
- Links: Tableau Dashboard | Power BI Dashboard | GitHub

Healthcare Patient Flow Analysis
- **Tech:** Power BI, SQL
- Reduced wait times by **10%** via scheduling/capacity analysis.
- Links: Power BI Dashboard | GitHub

Pharmacy Drug Sales Analysis
- Identified top-selling products, **improving marketing ROI by 20%**
- Links: Power Bi Dashboard | GitHub

CERTIFICATIONS

Google Data Analyst – DEPI (Digital Egypt Pioneers Initiative) (2025)

Power BI Specialist – Maven Analytics (2024)

Python for Data Analysis – Maven Analytics (2024)

Advanced SQL – 365 Data Science (2025)

Deloitte Data Analytics Virtual Internship (2025)

ADDITIONAL

- **Languages:** English (Professional), Arabic (Native)
- **Core Competencies:** Data Storytelling, Process Optimization, Cross-Functional Collaboration
